#### Testing and Certification

After the installation we test and certify everything to meet the most rigorous standards.

Our services include:

- Fume Hoods — ASHRAE 110, SEFA 1, ANSI Z9.5 and LTMW 1102 SOP.
- Biological Safety Cabinets — NSF Standard 49
- Laminar Flow Device Certification — Federal Standard 209B and IEST-RP-CC0002.2
- Clean Rooms — ISO 14644
- Specialty Area Evaluations — we have the equipment and expertise to provide testing for most applications.

#### It's All Right Here

Laboratory work is hard enough. Let LabTech make it easier for you. No one can match our local, end-to-end service. To find out more, phone, fax or e-mail us. Or visit our web site.

2100 S. Calhoun, New Berlin, WI 53151

**TESTING & CERTIFICATION**  
**LABORATORY DESIGN • SERVICE & REPAIR • CONSULTING**

# We've got laboratory furniture

# down to a science.

## **A Tradition of Excellence Gets Even Better.**

For more than a decade, LabTech Midwest has taken great pride in providing our customers with extraordinary service. That includes everything from designing, to selling, to installing, to testing and certifying laboratories. We pride ourselves on our complete turnkey service.

And now we can offer you even more. We've recently doubled our space and doubled our capacity to serve you, with a new 12,000 square foot facility.

Which means more options for you, including a vastly expanded selection of our famous "gently used" lab equipment.

We have installed laboratories all across the United States and in Puerto Rico, but our primary service area includes Wisconsin, Illinois, Indiana and Iowa. Which means, we're right nearby when you need us.

## **A Lab As Unique As You Are.**

LabTech can design to your precise requirements. Our design services include experienced professional space planning, along with detailed CAD drawings.

Whether you're building industrial, research, health care or education lab facilities, we specify high quality, state-of-the-art materials and we guarantee high quality finished installation.

## **We Start With Quality Products.**

To assure a quality installation, we deal only with quality products. The national and international manufacturers we use include:

- BMC — Metal and stainless steel laboratory casework and fume hoods.
- Collegedale Casework, LLC — Wood laboratory casework systems.
- AT Villa USA — State-of-the-art flexible laboratory casework systems.
- Addendum — Completely freestanding modular furniture systems.

And the best part is, we can deliver all this quality at a very reasonable cost.

## **Expert Installation**

We have our own installation department and factory-trained installers. This means you get the assurance of dealing with one reliable source through the entire process.

Whether you're getting a simple laboratory casework and countertop installation or a complete mechanical turnkey project, you'll love our on-time, on-budget, expert performance.
